

# REBOOTS ARM CUFFS 2.0

RECOVERY FOR ARMS,  
CHEST AND SHOULDERS

With the Arm Cuffs 2.0 we have further developed our existing Arm Cuff. As the perfect complement to existing Reboots Recovery Sets, they offer a comprehensive compression massage that extends from the hand and arms to the chest and shoulders. Thanks to the innovative Flow technology and overlapping chambers, more massage cycles are possible in the same time, allowing for a more effective recovery. The Arm Cuffs 2.0 are also equipped with the new EasyClip for easy handling. The Arm Cuffs 2.0 come in a double pack for right and left to guarantee an optimal fit. They are available with 4, 6 and 8 chambers and are compatible with all our devices.

## FEATURES

4, 6, 8					
Compression chambers	Recovery for arms, chest and shoulders	Overlapping chambers	EasyClip for easy handling	More massage cycles in the same time	Optimal recovery for right & left arm (double pack)

### EFFECTIVE REGENERATION

The chambers of the Arm Cuffs 2.0 overlap each other and thus avoid gaps that hinder reflux. The area-wide compression provides a particularly continuous and flowing massage and thus guarantees sustainably light and fresh arms.

### LIGHT ARM, CHEST & SHOULDER MUSCLES

With the new Arm Cuffs 2.0, we have improved the holistic regeneration of the arm muscles. Thanks to the adapted fit and cut, the upper chamber massages the chest and shoulder muscles in a targeted manner improving the recovery massage.

### EASY HANDLING

The Reboots Arm Cuffs 2.0 not only stand for maximum recovery, but also for user-friendliness. The EasyClip allows you to put on the Arm Cuff 2.0 with just one movement. No complicated tightening, no slipping.
