

The vision behind the development of the Reboots Go X was to offer athletes worldwide a unique and effective recovery system based on individual needs, combining all of Reboots' knowledge in the field of compression massage. The result is maximum freedom, customization and ease of use without compromising on performance with the new Reboots Go X!

No hoses, no sockets, no bullshit. Thanks to the new **AirX technology**, the Reboots Go X does not require a hose system and therefore offers **unrestricted freedom of movement and is easy to put on and take off.** With **1,5-hour battery life**, the Go X is the ideal companion for training camps, competitions or sports holidays.

The Reboots app perfects the user-friendliness of the Go X. The maximum pressure of 180mmHg of the **16 overlapping air chambers** can be individually controlled via the Reboots App to make regeneration as personalised as possible. The features of the Reboots Go X are unique on the market and make it an **absolutely innovative novelty!**

Xperience the future of recovery with the new Reboots Go X!

Overlapping chambers

AirX-TECHNOLOGY

Reboots has revolutionised the pump system with the new AirX technology, which makes it possible to connect individual pump units directly to the air chambers of the Pants. This eliminates the need for hoses and a large control unit. In addition, each of the in total 16 chambers can be individually adjusted to provide the best, quietest and most personalised compression massage ever!

REBOOTS APP

Thanks to the Reboots App, each pump unit can be controlled individually and the pressure intensity can be adjusted to suit your personal preferences. Choose from 8 recovery programs, create your own regeneration sequences, chose the Quick start program and save your favourite settings for the next session. The Reboots App offers endless possibilities to perfectly tailor the Reboots massage to your own needs - your pressure, your programs, your choice for the ultimate recovery!

OVERLAPPING TECHNOLOGY

With our innovative Overlapping Technology, the 8 overlapping air chambers per leg are perfectly harmonized. The overlapping is important to distribute the pressure evenly across the entire compression zone. This prevents fluid build-up and directs the blood flow continuously and effectively in one direction for an extra smooth massage.

SCOPE OF DELIVERY

- Reboots Go X
- 16 pump units
- Control device with battery
- Charging cable

Size	Inner leg length	Body size
S/M	65-84 cm	160 - 180 cm
L	> 85 cm	180 - 200 cm
